Authenticate Signers

While preparing the document, Sender has multiple options to Authenticate the signer

Step 1:
Sender selects the level of Authentication -

- Sign via email
- Mobile phone
- Face to Face Signing

The screenshot shows a software interface for document signing. At the top, a progress bar indicates three steps: 1. Select Signers and Document which needs to be signed, 2. Prepare Document for Signature, and 3. Send Email to Signers. The main interface is divided into several panels: 'Level of Authentication (Drag & Drop to right panel)', 'Signers', 'How Signers will Sign & Authenticate (Drag and Drop)', 'Insert Attachment in Email', and 'Send Email Message'. The 'Level of Authentication' panel on the left lists options: 'Send to signer signing request via' (Email OR Mobile OR Face To Face Signing), 'Signer will sign as below' (Upload or Choose Font OR By Drawing), and 'Request signer to upload below' (Medicare Card, Drivers License, Passport). The 'Signers' panel shows 'John Smith' with an 'Email Reminders' button and a 'Verify signer with OTP on Mobile' toggle set to 'OFF'. The 'How Signers will Sign & Authenticate' panel has a 'Drag & Drop' area with a 'Level of Authentication' dropdown. The 'Send Email Message' panel includes a text editor and a 'Send For Sign' button. Annotations include red circles around the authentication options, a blue arrow pointing from the 'Step 1' box to the 'Level of Authentication' panel, and blue dashed arrows labeled 'Drag & Drop' pointing from the 'Level of Authentication' panel to the 'How Signers will Sign & Authenticate' panel and from the 'Request signer to upload below' section to the 'Signers' panel. A 'Send For Sign' button is highlighted in green.

Step 2:
Higher authentication can be set by asking Signer to upload ID proof like Passport, Drivers License, Medicare Card

Step 3:
Double verification - Sender can choose to Verify Signer with OTP on Signer's registered mobile number.
